

Community Supporting the Journey of Children

Montessori Mathematics Workshop

The aim of Muintir Na Leanaí is to support parents and childcare professionals as they work together to create the best opportunities for children during the early years. We recognise the benefits resulting from refresher, in-service courses delivered by experienced professionals. Montessori Teachers, Students, Supervisors and Childcare Practitioners at every level, working in a Montessori environment can benefit from this expert in-service training and upskilling. Muintir Na Leanaí aims to support children by developing the skills of those caring for them.

Participants will enjoy sharing the enthusiasm and support of other practitioners attending the workshops. Get to know issues that are relevant to those working in the ECCE area. Demonstration of correct use and sequencing of Mathematics materials and room layout. Explore how the **Montessori Philosophy and practice incorporates the policies and practices of Síolta Principles and the Aistear Curriculum**. Participants will be inspired by creative Mathematics exercises and how this relates to other Montessori areas and the child's **home and play environment**. This will aid the practitioner and parents by helping the child make Mathematical connections between his/her experiences in a Montessori room and his home/life environment which will enhance his/her confidence to participate meaningfully at home and in all **play experiences**. Laying a solid foundation for character development and later learning and confident participation in primary school.
